

LIGHTSPEED 3.6 BOOSTS SPEED OF RETAIL PLATFORM, REDESIGNS KEY FEATURES

Adds Australian credit card processing through Tyro Payments

LightSpeed today announced the latest upgrades to its core platform with the release of [LightSpeed 3.6](#). Making strides in the areas of speed, payments and privileges, 3.6 boosts overall performance for all LightSpeed users and changes the playing field for Australian retailers with the addition of [credit card processing](#).

“The peak retail season is just getting under way, with Black Friday, Cyber Monday and Christmas all just around the corner,” said LightSpeed CEO, Dax Dasilva. “LightSpeed has increased the speed of its platform so that retailers can easily handle higher transaction volumes during this busy time of year.”

The newest version also boasts support for Australian credit card processing through [Tyro Payments](#), an improved payment-processing workflow for external payment terminals, the ability to choose the number of receipt copies per payment type, and better control over cash drawer opening. A redesigned Privileges window makes staff access restrictions to LightSpeed’s features easier to maintain.

To upgrade to [3.6](#), LightSpeed users will require a Support & Upgrades Subscription valid as of November 1, 2011, which can be renewed via a local LightSpeed [reseller](#) or by contacting [LightSpeed Sales](#).

LIGHTSPEED MOBILE NOW A FREE DOWNLOAD ON ITUNES

[LightSpeed Mobile 1.6](#), the award-winning mobile point-of-sale system, is compatible with LightSpeed 3.6 and is now available as a free download on iTunes. When paired with the 30-day LightSpeed demo, prospective users can test drive LightSpeed for both [Mac](#) and [Mobile](#). LightSpeed Mobile requires an available user license on LightSpeed Server.
