Press Release**21 May 2008****TYRO EFTPOS INTEGRATION**

After several months of trialing the Tyro EFTPOS system at locations in Forbes & Bathurst, CountryPharm CEO, Michael Flannery, is pleased to announce that Tyro has been chosen as the preferred EFTPOS partner for the CountryPharm Group.

In recent weeks Tyro successfully completed its integration project with CountryPharm's front of store software provider, Pos Browser and this was a major catalyst in the decision to work with Tyro. The integration was tested at Flannery's Pharmacy earlier this week and will be rolled out in all stores over the next few weeks.

The integration is wireless and therefore allows direct correlation of data and communication between Pos Browser and the EFTPOS terminal for fast, efficient service to customers and a more efficient process for staff.

The web based Tyro EFTPOS system allows for quicker processing of transactions, more reliability in retail operations as well as more easily accessible and timely reconciliation and reporting.

CountryPharm have been among the first retailers nationally to embrace this new breed of EFTPOS and are proud to have been a driving force behind the integration of Tyro with Pos Browser to improve functionality at store level.

CountryPharm is an award-winning group of eight retail pharmacies in regional New South Wales with locations in Parkes, Forbes, Orange and Bathurst as well as two pharmacies at Concord in the Sydney metropolitan area.

This project again reflects CountryPharm's support and commitment to its business partners, who are recognized as a very valuable part of the Group and its existence.
