

Tyro News: 16 December 2008

Tyro and HCN successfully pilot the first true Easyclaim solution

Today, at the Erskineville medical practice of Dr Robert J Lewin, a patient paid her invoice then saw her claim instantaneously processed and the Medicare rebate deposited straight back into her bank account. It took seconds. Finally, it is truly easy to claim with Medicare.

The patient was saved the hassle of lining up at a Medicare Office to claim her rebate and the Medicare rebate was immediately reflected in her account - she could use that money the minute she left the surgery.

The medical practice offered a superior patient service without cumbersome data entry, errors, payment delays or subsequent manual reconciliation headaches. The whole process was done and dusted in seconds.

Dr Lewin is one of a select group of beta testers for HCN software. Following the quick and straightforward installation process, he was delighted by the ease with which he was able to conduct both a patient paid and a bulk billed transaction.

"The Medicare Easyclaim solution is excellent and my patients love it", says Dr Lewin, whose practice has multiple PracSoft workstations linked to a single Tyro EFTPOS terminal. The fully integrated system is easy to operate, with minimal keystrokes making processing quick and efficient.

Senior Tyro personnel were on hand to ensure a smooth transition to Easyclaim. According to Garry Duursma from Tyro, "Ensuring that Tyro was fully compliant with Medicare's rigorous requirements has been a lengthy process. We are thrilled to have now validated the significant combined efforts of HCN, Tyro and Medicare to bring to market what we consider to be the only true Easyclaim."

On completion of beta testing requirements, the Tyro/HCN Easyclaim solution will be rolled out to participating PracSoft and BlueChip practices from mid to late January 2009.
